Benjamin Williams

Senior Software Engineer | iOS

Charlotte, NC | (864) 616-7390 | benwilliams0540@gmail.com | benwilliams0540.github.io

9+ years building production iOS apps, with hands-on SwiftUI, TCA, modular architecture, and CI/CD.

PROFESSIONAL EXPERIENCE

Senior iOS Developer | Phillips Auctioneers Apr 2024 - Apr 2026

- Helped take a SwiftUI and TCA auction app from an empty repository to the App Store, shipping timed bidding in under a year and streamed live bidding within two years
- Introduced Tuist and organized about 25 independently compilable modules for a four-engineer iOS team, eliminating project-file merge conflicts
- Wrote unit and snapshot tests alongside features across the SwiftUI and TCA codebase
- Built lifecycle-aware WebSocket connections and synchronized bidding clocks so device time could not affect countdowns, bid state, or submission
- Led architecture reviews, pairing, and QA/customer defect diagnosis; maintained Xcode Cloud CI/CD and a two-week release cadence

Principal Engineer | Ally Financial Nov 2021 - Dec 2023

- Built a SwiftUI demo app for UX partners to review and iterate on designs before production
- Integrated analytics and user-action tracking SDKs across UIKit, SwiftUI, and embedded web
- Migrated the team's CI/CD pipelines to Bitrise

Senior iOS Developer | TIAA Jul 2017 - Nov 2021

- Built a declarative MVVM layer over UIKit table and collection views in a long-running production app
- Moved the app from Carthage to Swift Package Manager, including third-party binary frameworks
- Isolated app code from the Transmit authentication SDK behind an internal package interface

CURRENT WORK

Splats May 2026 - Present

Co-developing a public-beta SwiftUI and TCA app for iPhone, iPad, and Mac that turns photos into 3D scenes. Maintaining ColmapKit and BrushKit, the open-source Swift packages that connect its native reconstruction and training engines.

SKILLS & EDUCATION

iOS: Swift • Objective-C • SwiftUI • UIKit • The Composable Architecture • MVVM

Build & CI: Tuist • Swift Package Manager • Fastlane • Xcode Cloud • Bitrise • GitHub Actions

BS Computer Science | Clemson University May 2017
